

Is AP Networking Right for You?

A Quick Self-Check for Students

This isn't a test, and there are no wrong answers. Check off the statements that sound like you, then see what your count suggests.

Check What Sounds Like You

- ☐ When my Wi-Fi cuts out, I want to know why.
- ☐ I'm curious about how one router lets a bunch of different devices share the same internet connection.
- ☐ I like the idea of building or fixing something concrete, like a network, a connection, or a setup, and seeing it work.
- ☐ I'm curious about how networks are kept secure.
- ☐ I'm interested in troubleshooting problems in real-world scenarios, like figuring out why a network is slow.
- ☐ I wonder how data gets from my phone to a server on the other side of the world.
- ☐ I like systems: how the pieces fit together and what happens when one piece breaks.
- ☐ I want a class that connects to in-demand IT and technology careers, even ones I haven't thought about yet.

What Your Count Suggests

5-8 **Checked most of these (5-8):** This could be a strong fit. Talk to your counselor about AP® Networking.

2-4 **Checked a few (2-4):** Still worth a conversation. Interest matters more than a perfect match.

0-1 **Checked one or none (0-1):** This one might not be where your curiosity is right now, and that's useful to know too. There's plenty of time to figure out what is.
