

SCORE WEEK FOR COUNSELORS

Using PSAT/NMSQT® Reporting Tools

Use these reports to move your students closer to college readiness.

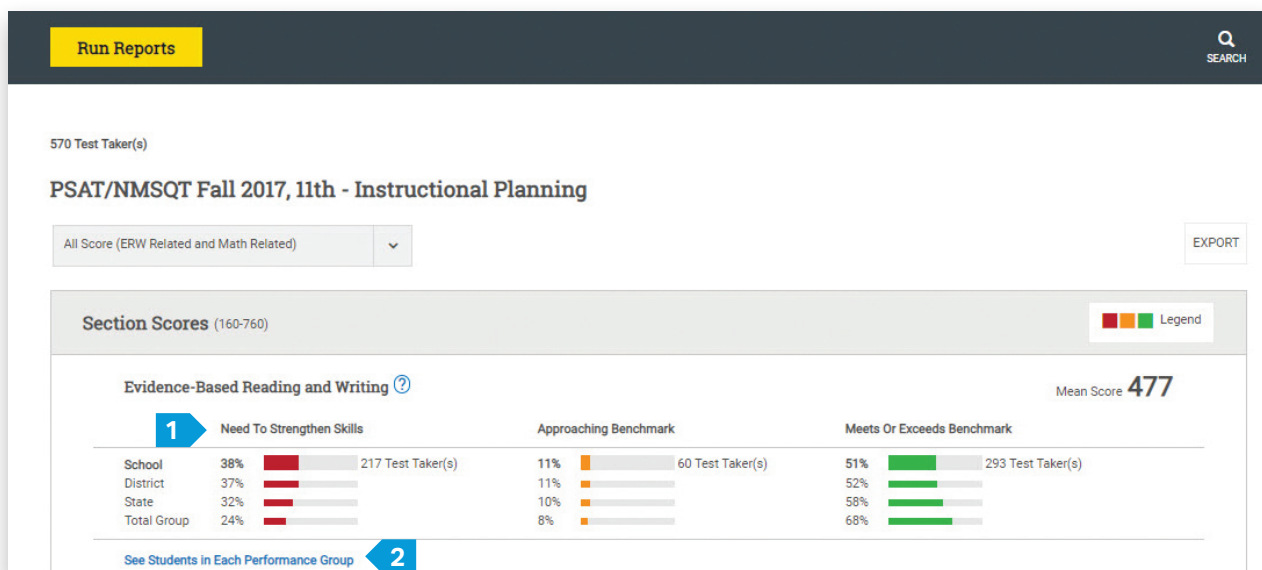

Instructional Planning Report

This report allows you to:

- View aggregate and student-level performance related to the benchmarks:
 - Need to Strengthen Skills
 - Approaching Benchmark
 - Meets or Exceeds Benchmark
- Drill through to the Question Analysis Report to identify questions linked to the cross-test scores and subscores.

Use this report to:

- Look for connections among questions and scores to identify areas of focus for intervention and curriculum review.
- Remember to include opportunities for skill reinforcement in science and social studies courses. Teachers in these content areas can review lessons and activities to ensure that students have the opportunity to practice analysis skills in these courses.

Question Analysis Report

Tips to use this report:

- Read each question included in the report by clicking on the numbers in this column.
- Review the correct answer for one or more questions and the number of students who selected the correct answer.
- Use difficulty indicators to determine the level of question students are struggling with:
 - ♦ If students are struggling with all levels of questions, review curriculum to ensure students are exposed to the content in class.
 - ♦ If students are struggling with hard questions, collaborate with other teachers to determine how to increase the level of difficulty students practice in classroom activities and other assessments.
 - ♦ Choose to batch print all question content, or print just the questions and answer choices.

This report allows you to:

- 1 View aggregate question performance for your school. If you are assigned the Detailed Reports role, you can view student-level question performance.
- 2 Compare your students' aggregate performance on a given question to the performance of all students in the district and state, and all test takers.
- 3 View question content and answer explanations for disclosed forms.
